

## Stand types

Shell scheme stands (see your contract if you have rented such stand) come with partition walls to shield your stand from neighbouring stands, fascia board with printed company name over open sides, and a carpet.

Space only stands (see your contract if you have rented such stand) come without any walls, carpet or fascia board.

**NOTE:** All stands are exclusive of electrical power outlet.

All shell scheme stands are built with AKKC standard materials, which are white sides and back walls in modules of 1 m x 2.50.

The fascia board over all open sides is white and 0.30 m high. The "signage height" which is the green area on the illustration is the area in which you can mount 0.20 m high letters/signs.
